

SriLankan Airlines, the National Carrier of Sri Lanka and a member of oneworld alliance, operates an extensive global network covering the Europe, Middle East, Africa, Indian Subcontinent, South East Asia, the Far East and Australia.

SriLankan IT Systems drives the airline's IT strategy through digital transformation, technology adoption, data modelling, business intelligence and business continuity. Focus is on transforming business and operational processes, expanding digital passenger reach and improving customer experience by solutions design, development and integrations while enhancing airline IT domain knowledge. Award winning SriLankan IT team is seeking dynamic individuals to join as:

Software Engineer (UI/ UX)

The incumbent is responsible to design and develop software solutions with attractive and user-friendly interfaces to fulfil and enhance user experiences. Produce high-quality visual designs-from concept to execution, including those for desktop, web, and mobile devices at a variety of Responsive resolutions (icons, graphics, and marketing materials). Create and iterate on assets that reflect a brand, enforce a language, and inject beauty and life into a product. Prior experience in HTML 5, CSS 3, JQuery, JavaScript, and Bootstrap is a must.

The roles may be a combination of activities involving:

- Consulting with clients to understand their goals and requirements.
- Creating wireframes, storyboards, sitemaps and screen flows
- Creating high-fidelity design and product prototypes
- Developing personas and usage scenarios
- Analyzing user feedback and activity, and iterating to enhance the user experience.
- Assisting with content development
- Conducting competitor and customer analysis
- Communicate design ideas and prototypes to developers, to ensure that the end product matches the original designs.
- Take ownership of the User Experience for a given project and work independently to see it to completion.
- Work on Azure DevOps (Added advantage)
- Follow Agile Software Development Methodology

Other Expectations

- Proven experience as a UX Designer, UI Designer or similar role.
- Knowledge on Web Accessibility and compliance
- Strong portfolio of design projects.
- Familiarity with interaction design and information architecture.
- Proficient in design and prototyping software (e.g. Adobe XD, Balsamiq).
- Problem-solving aptitude.
- Analytical mind with business acumen.
- Excellent communication skills.

The applicant should possess the following minimum requirements for the above position:

- Bachelor's Degree in Engineering, Computer Science, General Science with Mathematics, Management Information Systems or Applied Statistics from a recognised University with minimum of 01 year post qualifying relevant experience
- OR**
- Full professional qualification equivalent to NVQ Level 7 with 3 years post qualifying experience in a relevant discipline
