

PRESIDENTIAL SECRETARIAT

ANALYST VACANCIES

Is this you?

Want to use your skills to tackle some of the country's biggest problems? Believe that policies grounded in evidence are the only way forward? Want to engage in the process of developing data-driven solutions and robust policies in a vibrant democracy?

About us

The Analytics Team of the Presidential Secretariat is comprised of a group of young people who, wrestle with challenging, real world problems concerning the country's economic development and the public well-being on a daily basis.

We are looking for

Self-driven individuals with,

- Bachelor's degree in Data Science / Statistics / Computer Science / Economics / Policy Studies or a related field and equivalent academic qualification in a relevant field
- Strong analytical skills with a solid intuition for data. Experience in data collection/mining, econometrics, mathematical modeling, data warehousing and data visualization will be crucial
- Excellent written and verbal communication skills

You will be

- Engaging with a range of Government and non-Government agencies in identifying issues and mapping out solutions
- Identifying and gathering data from multiple sources and developing in-house databases
- Wrangling and analyzing data which will form the analytical core of the evidence-based policy making process
- Presenting your findings and recommendations

Benefits

We offer an attractive remuneration package but we are looking for individuals whose passion and purpose far exceed the purely monetary benefits. The contract initially, would be for a period of one year.

Interested

If this interests you and you think you qualify, reach out to us right away ppd@presidentsoffice.lk

Application Deadline: Within 7 days from the advertisement date

Presidential Secretariat
Galle Face, Colombo 01.
