Are you ready to step into your future?

Seylan Bank is one of the most progressive and innovative banks in the country with a commitment to serve people from the heart. This is your opportunity to join a dynamic team with the promise of a great career.

Data Analyst – Business Intelligence

Job Responsibilities

- Collect and document user requirements for BI reports and dashboards.
- Identify required variables, data sources and calculation methods for reporting requirements.
- Identify analysis methods to obtain insights from available data.
- Conduct analysis in accordance with the guidelines set by the Head of BI.
- Interpret analysis and communicate findings with effective visualizations to the relevant audiences.
- Design and create reports and dashboards using the BI platform and disseminate required information to the relevant parties as needed.
- Communicate unavailability or limitations in data to the Head of BI and relevant parties.
- Support the IT team with data definitions, categorizations and the ETL process required for BI.
- Continuously research on emerging trends in BI to identify and implement within the Bank

The Person

- Minimum 2 - 3 years experience in Banking.
- A Bachelor's degree in Computer Science, Statistics, Mathematics, Finance, Management or Economics.
- Excellent written and verbal communication skills.
- Experience in working with BI tools (e.g., Tableau) is preferred
