

# MANAGER – SOFTWARE DEVELOPMENT / SOLUTIONS ARCHITECT

We are seeking a dynamic and results-driven Manager – Software Development / Solutions Architect who will play a pivotal role in leading and transforming the Bank's software development function under IT. The ideal candidate will be expected to drive innovation, strengthen in-house development capabilities, and deliver high-quality, secure, and scalable solutions aligned with business goals. This is a key position that offers the opportunity to make a significant and lasting impact on the Bank's digital journey.

## THE JOB

- Align solution designs with the strategic goals of various business lines, ensuring that architectural decisions support long-term business objectives, scalability, and quality standards.
- Stay current with Software Development Life Cycle (SDLC) best practices and emerging IT application trends in the banking industry to design future-ready, efficient, and secure solutions.
- Collaborate in project planning to ensure solution designs align with delivery timelines, architectural standards, and project management frameworks
- Provide architectural input to guide effective resource allocation based on project priorities, complexity, and delivery schedules, ensuring optimal alignment with solution design requirements
- Define all aspects of solution architecture, including technology stack, integration workflows, coding standards, tools, and methodologies, to ensure seamless system integration and delivery of robust, defect-minimized solutions aligned with project objectives.
- Ensure that software solutions meet defined standards for quality, security, modifiability, and extensibility, while being delivered within agreed timelines and aligned with architectural best practices.
- The Solutions Architect is expected to lead by example, demonstrating hands-on expertise in modern programming languages and frameworks while championing the adoption of the latest coding standards and development best practices. This role requires setting a high benchmark for code quality, efficiency, and maintainability—guiding and mentoring development teams through practical, real-world application of cutting-edge technologies and scalable design patterns.

## THE PERSON

- Possess Bachelor degree in Computer Science/Information Technology, Engineering or equivalent Professional qualification
- Master's in IT will be an added advantage
- Possess 08 years of experience in software development & Solutions architecture.
- Good understanding of MS Project and System/software orientation
- Possess excellent interpersonal and communication skills with good presentation skill
- Excellent problem-solving skills, Analytical Skills with Excel data base management techniques
- Ability to work to deadlines, under pressure

The position is at Manager Level
