

We are Sri Lanka's premier private sector commercial bank. Our visionary journey has taken us beyond the realms of business as we have made a conscious effort to go where no bank has dared to go; from downtrodden villages long-forgotten, to the world across the shores. The driving force behind this epoch-making journey is our strong team of achievers, affectionately known as the Hatna Family. As we continue to make history and move ahead, we invite dynamic and ambitious individuals to join us in our trailblazing banking saga.

We are looking for bright minds to help us create a world of happy experiences.

SENIOR/LEAD MIDDLEWARE AND INTEGRATION ENGINEER (PYTHON + JAVA)

Job Role

This role requires strong engineering discipline, API-first mindset, and the ability to deliver reliable integrations in a regulated, high-availability environment

Key Duties and Responsibilities

- Design and develop middleware services and integration components using Python and Java.
- Build and manage API integrations between internal platforms, core systems, channels, and external partners.
- Develop secure REST APIs and integration services with proper authentication and authorization controls.
- Work with message-based integration patterns (queues, pub/sub, event streaming).
- Implement transformation, validation, routing, orchestration, and error-handling logic in integration flows.
- Ensure reliability using retry strategies, idempotency, timeouts, and resilience patterns.
- Support troubleshooting, root cause analysis, and production issue resolution for integration failures.
- Work closely with Solution Architects, DevOps, QA, and Security teams to deliver stable releases.
- Participate in Agile/Scrum ceremonies and contribute to sprint delivery commitments.
- Maintain integration documentation, API specs, and technical runbooks.

Educational Qualifications

- A Degree from a recognized University in the fields of Computer Science, Software Engineering/IT or relevant field
- A Master's Degree in Computer Science, Software Engineering/IT or a relevant field will be an added advantage.

Work Experience

- Minimum 3+ years of experience in the software engineering
- Experience with API gateways such as WSO2, Kong, Apigee, etc. will be an added advantage.
- Experience in regulated environment such as banking, fintech or payments will also be an added advantage.

Skills and Competencies

- Middleware and Integration Development
- API-First Engineering
- Message-Based Integration
- Integration Patterns and Flow Design
- Reliability and Resilience Engineering
- Troubleshooting and production support
- Secure integration engineering
- Quality and DevOps Collaboration
- Technical leadership
- Cross-functional collaboration
