SENIOR MANAGER – IT INFRASTRUCTURE
Information Technology Department

About The Bank:

Armed with a proud history of over 30 years, Pan Asia Bank is on an exciting growth journey, evidenced by an array of recognitions, including being honored as one of the Top 40 business entities in the country by Business Today, the most awarded entities by LMD, Best Green Bank in Sri Lanka by Global Banking & Finance, Best Bank for ESG by International Business Magazine, the Best CSR Bank by Brands & Business Magazine, to name a few.

Key Responsibilities:

- Lead and manage IT infrastructure teams (DevOps, Network, DBA, NOC, Infra) to maintain service uptime and system resilience
- Implement coordinated infrastructure initiatives that align with organisational priorities, ensuring they are completed on time and within budget
- Engineer and administer enterprise infrastructure across on-premises and cloud (AWS, Azure) environments
- Maintain systems operating on Red Hat, Windows, AIX, and Solaris
- Manage and monitor virtualisation container ecosystems (Docker, Kubernetes), and cloud services
- Manage observability and performance monitoring with tools
- Lead the functions such as patching, system security, and risk mitigation processes
- Engage vendor relationships, SLA enforcement, procurement, and contract management
- Ensure compliance with security standards, audits, disaster recovery protocols, regulatory and cybersecurity requirements
- Streamline operations through automation using different recommended industrial technologies
- Manage facilities IT (cabling, access points, surveillance), and ensure DR/BCP readiness
- Establish and implement infrastructure policies, governance, and security standards; integrate mobile and BYOD securely
- Lead IT budgeting, cost control, and long-term forecasting to meet evolving business needs.
- Engage with senior leadership to align IT infrastructure strategy with organisational goals
- Train, mentor, and evaluate the performance of staff in the IT infrastructure unit, building a high-performance team

Candidate Criteria:

- A Bachelor's degree in Information Technology or a related field from a recognised university or institute is essential
- Possession of a Master's degree in IT is an added advantage
- A minimum of 08 - 05 years of proven managerial experience in enterprise IT infrastructure, preferably within the banking or financial sector
- Hands-on experience in managing systems on Unix, Linux, and Windows platforms
- Strong knowledge of enterprise IT infrastructure, including computers, storage, and network domains
- Solid background in virtualisation (VMware) and containerization (Docker/Kubernetes)
- In-depth understanding of capacity planning, disaster recovery, and high-availability architectures
- Exposure to DevOps culture and continuous integration/delivery (CI/CD) tools
- Vendor-specific certifications, such as Red Hat, VMware, or IBM, are a plus
- Familiarity with regulatory compliance frameworks, such as ISO 27001 and PCI DSS, is advantageous
- Should possess strategic thinking, decision-making, and team management skills
- Ability to collaborate effectively with cross-functional teams within the IT department and other related departments

Remuneration:

The successful candidates will be provided with an attractive remuneration package including fringe benefits, commensurate with industry standards.

How to Apply:

Take the next step in your career and be part of a team that values growth, collaboration, and excellence. Interested candidates are invited to submit their resumes through our career portal before the specified deadline.
