SYSTEM ADMINISTRATOR – IBM POWER SYSTEMS & AIX

The job holder will be responsible to lead a team of Relationship Managers who are responsible for monitoring and developing accounts mapped to them. He/ she is also responsible to generate new business, sanction loans and ensure timely credit delivery. The position holders will report to the Regional Head - Branch Network. Vacancy is available in the North & East Region.

THE JOB

- Install, configure and continuously optimise mission-critical production server and storage infrastructure and related Operating Systems
- Manage and execute production application deployments, patches, upgrades, releases, and package rollouts across production and Disaster Recovery environments
- Coordinate with vendors and service providers for hardware support, maintenance, warranty services, and infrastructure projects
- Administrate and support platform lifecycle activities, including operating system upgrades, infrastructure refreshes and technology modernisation initiatives
- Prepare and execute system migration plans, including validation and rollback procedures
- Develop and maintain scripts to automate routine system administration and operational tasks
- Assess infrastructure performance, operational requirements and provide recommendations to improve system availability, capacity and reliability
- Coordinating with application, database, network and information security teams to resolve incidents and service disruptions
- Participating in major incident management and restoration of critical business services
- Maintain appropriate system security configurations and support security hardening, vulnerability remediation, and audit requirements
- Perform Root Cause Analysis (RCA) and implementing corrective and preventive actions
- Support in Disaster Recovery testing, simulation exercises and recovery validation activities
- Facilitating knowledge transfer programs to reduce key-person dependency
- Provide 24×7 support, troubleshooting, and resolution of complex incidents affecting production systems

THE PERSON

- Possess a degree/diploma in Information Technology or related professional certifications on AIX System Administration
- Possess minimum 04 years of experience in AIX related System Administration and overall 06 years of experience in IT
- Hands on working experience with IBM Power Systems, IBM Storage and AIX environments would be an added advantage
- Strong analytical, problem-solving, decision-making and troubleshooting skills

The position is at Executive level.
