JOIN THE TEAM
OF CARGILLS BANK

Team Lead
Network and Firewall Administration

Main Responsibilities

- Lead the Firewall and WAF team through work allocation, technical guidance, performance reviews, escalations and on-call rosters
- Administrate and maintain enterprise-grade Firewall platforms (Palo Alto, Check Point, Fortinet, F5) and associated network security infrastructure across bank environments
- Manage and optimize firewall rulesets based on least-privilege principles, conducting regular reviews, recertifications, and cleanup of redundant configurations
- Implement and manage web application security controls, including OWASP Top 10 mitigation, rate limiting, bot protection, and API security
- Lead technical responses to major network security incidents, performing troubleshooting, containment, recovery, and root cause analysis
- Oversee system performance, capacity, patching, firmware upgrades, high-availability testing, and configuration backups to ensure high availability and operational resilience
- Ensure configurations align with internal security policies, PCI-DSS, ISO 27001, and regulatory standards, providing required evidence for audits and remediating findings on time
- Review and assess the security impact of infrastructure changes at CAB (Change Advisory Board), while maintaining accurate architecture diagrams, procedures, and operational runbooks
- Partner with third-party vendors for support, hardware/software upgrades, and licensing, while collaborating cross-functionally with Network, Cloud, DevOps, and InfoSec teams
- Identify opportunities for rule optimization, security automation, and configuration reviews to continuously enhance the bank's security posture and operational efficiency

Experience & Qualifications

- Possess minimum 4+ years of hands-on experience in Network Device and Firewall Administration, with at least 2 years in a technical lead or supervisory role.
- Expertise in configuring, troubleshooting, and administering Palo Alto, Check Point, Fortinet Next-Generation Firewalls and Cisco, HP, Aruba, Huawei switching layers infrastructure
- Proven hands-on experience with enterprise WAF, including custom rule creation and API protection
- Active professional-level certifications such as PCNSE (Palo Alto), CCSA (Check Point), NSE 4 (Fortinet), or CCNA / CCNP
- Good understanding of core networking protocols (TCP/IP, BGP, OSPF, VPN/IPsec,VLANs) and security architecture in public cloud environments.
- Bachelor's degree in IT or an equivalent professional qualification
- Strong leadership, problem-solving, and decision-making skills, with excellent communication abilities to articulate technical security concepts to non-technical stakeholders
